

Pomoli

Knobs

Pommeaux

Knöpfe

A **thousand year old technique** and art that merge - and here it is appropriate to say - with **craftsmanship** that requires skill and technique. Another aspect must be added to these elements, namely **Italian design**: combined, these can only lead to excellence. This describes the company **Fama International**, founded in 2000, which has based its success on the foundation of a tradition that is solid and highly valued in the local area: **metalworking**. Within a short space of time, Fama, thanks to its business know-how in keeping up with innovation and trends, has quickly become one of the leading companies in the small hardware sector at a European level, then concentrating on the production of accessories for the home. Indeed Fama offers **exclusive products**, genuine pieces of furnishings and design: furniture **knobs, knockers and handles for doors, door stops**, handrail brackets, hinges and bolts.

Here technique becomes art, epitomised in the pure concept of craftsmanship. The material is in fact forged according to an ancient technique, the charm of a tradition that has remained unchanged over the centuries. As a result - as masters of the technique - it becomes easy to create a product that fully complies with the client's requirements, thus making it possible to offer a **unique design along with complete customisation**.

La **tecnica millenaria** e l'**arte** che si fonde - e qui è proprio il caso di dirlo - con un **artigianato** che richiede perizia e tecnica. A queste peculiarità va aggiunto un ulteriore aspetto, ovvero il **design italiano**: la sommatoria di tutto ciò non può che generare eccellenza. Tutto questo è l'azienda **Fama International**, nata nel 2000, che ha basato il proprio successo sulle fondamenta di una tradizione solidissima e molto sentita nel territorio di appartenenza: la **lavorazione dei metalli**. In poco tempo Fama, grazie al proprio know-how aziendale al passo con innovazioni e tendenze, è presto diventata una realtà di spicco nel settore della piccola ferramenta a livello europeo, per poi concentrarsi sulla produzione di accessoristica dedicata alla casa. Fama offre infatti **prodotti esclusivi**, veri e propri componenti d'arredo e di design: **pomoli per mobili, battenti e maniglie per porte, fermaporta**, supporti corrimano, cerniere e catenacci.

Qui la tecnica diventa arte, riassunta nel puro concetto di artigianato. La materia viene infatti forgiata secondo un'antica tecnica, nel fascino di una tradizione che è rimasta inalterata nei secoli. Ecco che - padroni della tecnica - diventa semplice eseguire un prodotto che rispecchi in toto le richieste della committenza, permettendo in tal modo di offrire un **design unico e personalizzazione assoluta**.
